

INTERNATIONAL COMPANY AGRO-SCIENCE

TECHNICAL DATA SHEET

ORGANOR N 12

PARAMETER	UNITS	RESULT	ANALYTICAL METHOD
Total nitrogen	%	11	N-analyzer
Organic nitrogen	%	10	N-Kjeldhal detection
Organic carbon	%	25	Volumetric titration

Fulvic Acids ≥ 150 (g / L)
Auxins ≥ 800 (ppm)
Cytokinins ≥ 1000 (ppm)
Vitamins..... ≥ 1000 (ppm)
Polymerization polysaccharides..... ≥ 150 (g / L)

Organic nitrogen fertilizer Fluid blend of organic nitrogen fertilizers

ALLOWED IN ORGANIC FARMING

Product obtained from the following fluid-based organic nitrogen fertilizers “allowed in organic farming”:
fluid Borlanda, and fluid Borlanda of fruit and cereals, extracted without ammonia salts.

INTERNATIONAL COMPANY AGRO-SCIENCE

TECHNICAL DATA SHEET

ORGANOR N 12

PHYSICAL PROPERTIES

Formulation	Brown paste liquid	Visual examination
Density	1,25 g/cm ³	Gravimetric analysis

Raw material:

Selected amino acids of vegetal origin.

Benefits:

The balanced ratio between nitrogen and organic carbon, both with a high titre, together with the presence of growth factors of natural origin promote a general increase in metabolism in all growth stages of plants, with greater efficiency in the uptake of nutrients already present in the soil and/or supplied with other fertilizers.

DOSAGES

FOLIAR TREATMENTS	DOSAGES
Fruit trees	150-250 gr/100 lt of water
Vegetables	100-200 gr/100 lt of water
Greenhouse crops	100-200 gr/100 lt of water

STORAGE: Store at temperatures between 5 and 35°C.
Store product in suitable area.
In case of spillage, absorb with sand and act according to local regulations.
DO NOT dispose empty packaging in the environment after use.

PACKAGING: 1KG, 5KG
