Water and soil improver for Agriculture

- Water-soluble fertilizer
- Solid product
- Suitable for all kind of crops
- Root application
- Allowed in Organic Agriculture

PRODUCT DESCRIPTION

Soluble powder product for application via irrigation systems.

A blend of plant amino acids with potassium (K) and calcium (Ca), combined in a special formulation, that works by dissolving all types of insoluble salts in the soil.

BENEFITS

The immediate benefits provided by the product are:

1. Conditions soil and water in saline conditions.
2. Drastic reduction in salinity with an average dose of 1 kg/ha of product. Unblocks the clay-humus complex.
3. Nourishes and biostimulates the plant thanks to the action of the nutrients Ca and K and the amino acids in its formulation, helping to restore and/or maintain water balance in the plant.
4. Cleans the drip irrigation system, removing any obstructions.

On an environmental level, the product is packaged in aluminum foil envelopes, reducing the use of plastic in the environment, and facilitating transport and handling of the product, as well as the recycling of packaging waste.

COMPOSITION

% w/w

Free Vegetables amino acids	9,0
Nitrogen total (N)	1,5
Nitrogen organic (N)	1,5
Potassium Oxide (K ₂ O)	
water-soluble	18,5
Calcium Oxide (CaO)	
water-soluble	2,5
Zinc Oxide (ZnO)	
water-soluble	2,0

Aminogram: Glycine 6%, Glutamic Acid, Aspartic Acid

Soluble Powder pH (4%): 4 ± 1

Solubility: 10 g/L – 1 kg/100 L

Packaging 1 - 5 Kg

DOSAGE AND INSTRUCTIONS FOR USE

Use once a month if necessary.

Soil EC (Electrical Conductivity) 4 – 4.5 dS/m

Recommended dosage: 1 kg/ha per month.

0.5 kg/ha can be applied every 15 days.

Soil EC (Electrical Conductivity) >5 dS/m

Recommended dosage: 2 kg/ha per month.

1 kg/ha can be applied every 15 days.

Product authorized for EU organic farming. No. 13391. UNE Standard 142500.
